Flutter Developer Intern

11/2022 – 07/2023
Bangalore, India

- Integrated Firebase Notification into a mobile application to enable real-time push notifications and enhance user engagement.
- Implemented Firebase Phone Authentication to enable secure, two-factor authentication for users.
- Implemented Rest Api.

PROJECTS

Finisso ERP

08/2023 – present

Finisso ERP is designed to simplify operations, offering comprehensive tools for finance management, accounts, inventory control and stock management. It also manages various modules of the ERP system such as Masters, Vouchers, and Reports.

Tool Used : MVC architecture, Git, REST API, Getx Statemanagment, Postman

KOT (Kitchen Order Ticket)

12/2023 – present

A Kitchen Order Ticket (KOT) is an essential document in the food and beverage industry used to communicate orders from the front-of-house staff to the kitchen staff. The KOT system ensures accurate and timely preparation of food and beverages by detailing the specific items ordered, their quantities, any special instructions, and the table or order number. This system helps streamline operations, minimize errors, and enhance overall efficiency in a restaurant or food service establishment.

Integrated the system with existing ERP and Point of Sale (POS) systems.

Tool Used : MVC architecture, Git, REST API, Getx Statemanagment, Postman

Marketing App

02/2024 – present

The Marketing App is designed to simplify the process for field assistants in gathering consumer data. It offers tools for efficient data collection, customer engagement, data analytics, and performance tracking.

Tool Used : MVC pattern, Getx, Postman

Van Sale App

06/2024 – present

A Van Sale App is a specialized mobile application designed to support the sales operations of businesses that use vans or mobile units for direct selling of products to customers.

Tool Used : MVC architecture, Git, REST API, Getx Statemanagment, Postman

EDUCATION

Bachelor of Computer Science
Thunchathezhuthachan College

06/2018 – 09/2021
Nemmara, India
